

Green Labs NL - looking for new volunteer

At Green Labs NL we work on a voluntary basis for a few hours per week, next to our jobs. Currently, we are working on acquiring funding to pay people for a few hours per week for certain projects. We are looking for people who are affiliated with the Dutch scientific community.

Core team member: Green Data Science

Role:

As our expert on green data science, you will help us expand our expertise in how to reduce the impact of dry-lab research and data life cycle (green algorithms and computing, data storage etc.). Task overview:

- Building a green data science community
- Gathering resources for the green labs community
- Developing green data science strategies
- Prepare and give talks and workshops to a relevant audience

All in collaboration with other Green Labs NL members

General requirements & skills:

- Experience with data and computing in research
- Passionate about lab sustainability and planetary health
- Research work experience or knowledge of research environment (preferably in life sciences)
- Time investment is flexible (from 3-4 hours a month to a few hours a week)

We offer:

- Working with a passionate and motivated group of people striving to make a difference towards more sustainable research practices
- Becoming part of a sustainability-minded network of scientists across Europe
- Developing communication, management and team-working skills
- Possibility to join various projects (education activities, community building)
- At Green Labs NL we currently work on a voluntary basis. As we expand and professionalise our organisation, opportunities to take on paid work may arise.
